FISH WEARS FUR OVERCOAT.

Alaska.

Winnipeg, Man.-The following has been received by mail from Dawson

"Scientists will be puzzled wher they hear of a recent discovery made at Moosehide. So strange a demon stration of freaks of nature has never before been published.

"Indian Tom of Moosehide brought in the news. He says the whole tribe is worn out with speculation as to what the strange happening portends for the future of the Indian race. "After Christmas-just after the an anal potlach-some industrious Indians thought it would be wise to

catch some fresh greyling for the Daw-

son market. "The first fish hooked was a grey ling ten inches long. It had fur all Charles Tripler, who gained fame in over it. Never before did an Indian connection with liquid air experi- see any edible fish wearing a fur overments. Several years ago he came coat. The head of the strange fish, says Indian Tom, is just like that of purchased the Hank place, on Broad an ordinary greyling, and the shape

"But from the back of the gills down to the end of the tail the fish is covhis wife. She began to make arranges ered with a soft fur. The color of the for is a dark brown, exactly the achromatic tone and color of the taste of the morning after a whole night of jackpots. No wonder the Moosehide Indians have all decided to swear off with the new year." .

HOW WE ESCAPED BEING FISH.

Earth Would Have Been Completely Enveloped by Oceans But for Moon.

Chicago.-If it were not for the moon the inhabitants of this world would to-day be swimming around in one world-sized fishpond. Fins and scales would be their only clothes. Augleworms would be their diet, and they probably would be furnishing the greatest sport for the fishermen who inhabit Mars and other nearby worlds.

How they escaped this fate is explained by Dr. William H. Pickering. professor of astronomy in the Massa chusetts institute of Technology and in the Harvard observatory, in the Journal of Geology, issued from the University of Chicago.

He contends that the moon was made out of materials which formerly fisled the basin of the Pacific ocean. and that when it separated from the earth it took along three-fourths of the earth's crust, the remainder of the crust being torn in two to form the eastern and western continents.

"If the moon had not been formed, or if it had carried away the whole of the terrestrial crust, our earth would have been completely enveloped by its oceans," be says.

THE WARBHIP NIADARA

Rulic of the Old United States Navy Will Be Sent to Jamestown Exposition from the Charlestown Navy Yard.

Beston.-An immense eagle, ten feet bigh and 12 feet long and weighing about a ton, is inclosed in a great wooden cage at the Charlestown navy rard, and within a day or two will start for the Jamestown exposition on sepecial car, in compliance with or-fers from the navy department at Washington...

For many years this bird, which is arved in wood, has made its home at the local yard, for a good part of the time resting on a large wooden pedesal in the middle of the gun park, where it has been the wonder of thousands of visitors from all parts of the world.

Carved with wonderful skill and made in the strongest and most careful manner, the eagle originally was designed for use as a stem ornament on the United States ship Niagara, and for several years, or during the life of that ship, on the active service list of the navy the big bird proudly float ed at the Niagara's prow, his head pro truding over the water and the wings partly extended, resting against the sides of the stem.

In order that the wings might fit properly, a section of the bird's back was removed, and when the Niagara was put out of commission and stripped of its fittings at this yard soon after the civil war the eagle was removed and placed in one of the buildings. Pinally it was brought out again, the back filled in, and it was painted and set up on the pedestal which had been built especially for it In order to make the bird still more for many years a picturesque figure lifelike a pair of the largest artificial eyes manufactured was purchased and state of Maine. A mania for attending set in place. Probably no wooden camp-meetings was not his only dis- ship of the American navy ever had a tinction. He was a good deal of a more striking or artistic stem orna

FOR ONE LONELY VOTER.

Remarkable Election Held in a District in France.

A curious election took place at Les Sables, in the department of the Var, recently, when a single elector drew up the whole list of candidates and was the only one to vote. He naturally voted for his whole list, himself The commune contains about 500 inhabitants. Some time ago the municipal council resigned. Elections were held on November 25 last, when only fourmen came to vote. There was to be a second election last Sunday. The whole day passed and not a solltary voter appeared. quarter of an hour before the legal zen at last appeared, drew up a list of ten candidates, including himself, and voted. A quarter of an hour later the and the other nine candidates were

fimit of time clapsed a benevolent citielection was declared legally valid. duly notified of their election. They have since declined in a body to be cently torn down to make room for a elected by a single vote. The good natured citizen, therefore, who alone voted now constitutes by himself the town council of Les Sables. What is stranger still is that he may invoke a precedent. In fact, on a previous occasion, another citizen was also the sole voter at an election, and voted ey's squadron at the battle of Ma for himself, remaining legally in office for ten years. This would indicate that political activity is at a low eb? minister, M. Clemenceau, is senato for that department. Perhaps his energy makes up for the negligeace of the rest.

SHERIDAN VERY MUCH ALIVE.

Good Joke Brought Off in the Days of the Regency.

The First Gentleman in Europe dictated to Sheridan a letter making fun of the grotesque appearance of a crony of the Prince's, Maj. Hanger, at a ball given in celebration of the Queen's birthday. The Major, on receipt of a letter, hastened to show it to the Prince, who insisted that only a duel a outrance could wipe out the insult. On examining the handwriting the Prince said he had panies L and M all additional sums the author of "The School for Scandal" was accordingly challenged. The duel was of such vindictive deadilness that it was not till three shots on either side had been interchanged. and till Sheridan fell, that the honor of the Major was satisfied. "Killed, by G—!" exclaimed Capt. Morris. in a voice of horror, and he and his risky means of curring propagation in the capt. a voice of horror, and he and his principal, the Major, fled the fleid. Unspeakable was the relief of the remorseful Major when Sheridan turned up that night at the Prince's dinner table. "How-how-how is this?" he stammered. "I thought I had killed you!" "No, my good fel-low," replied Sheridan. "I wasn't good enough to go to the world above; nor as yet quite bad enough to go to that below; therefore, I deferred my departure. But, I say, Hunger, didn't I die well?" It was then explained to the mystified Major how he had been houxed by the Prince, who had arranged that the pistols should be

> Open to Grave Doubt. Richard Harding Davis was talking in New York about the life of a re-

charged only with powder.

"A hard life it is," said he. "It is life that taxes all the energies. I don't care how great a genius a man might be, how resourceful, how persevering, how alert, all these qual-ities would be brought in play if the man turned teporter and on many a good story he would still fall down

Reporters are often snubbed. There is a stupid type of man that likes to snub them. Such a man, a bank president, once tried to saub my friend Jimmy Patterson.

"The bank had gone up through a defalcation, and Jimmy went to interview its head. But its head was crusty. He refused to be interviewed. He took Jimmy by the arm and led him toward the door. THE PERSON NAMED IN

'Young man,' he said, 'I always make it a rule to mind my own busi-

neas. "Were you doing that, said Jimmy, when the cashler made his haul?

Long Talks in London.

Those who sometimes complain of the inadequate telephone facilities of London doubtless do not realize that the metropolitan telephone's area is by far the largest city telephone area in the world, covering over 640 square miles, a space in which Paris, Berlin, Vienna, St. Petersburg, New York and Chicago could all be set out with room to spare. The difficulties and the cost of building and maintaining a uniform telephone system at unfform rates in such a vast area, especially without proper facilities for constructing underground conduits for the wires-facilities which have always been refused by the authorities though denied to no other electrical undertakingare not in the least appreciated by the average telephone loser,--London En-

Bill Knew Grease.

One day Bill had company to dine with him, and his wife, wishing William to appear well, quietly admon-ished him to be careful what he said. All went well till bill got his pota-toes well mashed, when he said:

"Dolly, pass the grease."
"Why, William," said his wife, "you,"

should call it gravy." "Wa-at, says Bill, "I guess if it got or your tablecloth it would be grease."

At the pit of a coal mine in Pennsylvania there have occurred, during the past few months, quite a number of accidents whereby Innocent bystanders have come to grief. Accordingly, some kind official has caused to be posted a notice that reaches the acma not tumble down the shaft."-Harper's

The Hairdresser's Problem. "I am told," said the customer in the operating chair, "that there are more persons in the world than any one of them has hairs on his head." sir!" said the hairdresser. "Then it follows that two persons at least must have the same number of hairs on their heads!" Is that a fact?
